PATENT AND TRADEMARK OFFICE NOTICES

Results of Trial Voluntary Protest Programs

This notice updates the results of the First Trial Voluntary Protest Program and summarizes the preliminary results of the Second Trial Voluntary Protest Program.

First Trial Voluntary Protest Program

The First Trial Voluntary Protest Program was announced in the Commissioner's Notice of May 7, 1974, which appeared in the OFFICIAL GAZETTE on June 4, 1974 at 923 O.G. 2. The preliminary results of the program were summarized in the Commissioner's Notice of September 4, 1975, which appeared in the OFFICIAL GAZETTE on October 7, 1975 at 939 O.G. 1.

In the First Trial Voluntary Protest Program, 667 applications were published for protest. Sixty-seven protests were received in sixty applications. Prosecution was reopened in 37 of the protested applications.

The current status of the 667 published applications is shown in Table I.

TABLE I.—STATUS OF PUBLISHED APPLICATIONS

The issues or grounds for non-patentability raised in the Office actions reopening prosecution in the 37 applications reopened for prosecution are tabulated in Table II. The number shown indicates the number of applications in which the indicated issue was raised. It will be noted that more than one issue was raised in some applications.

The applications in which prosecution has not been concluded contained 96 allowed claims of which 62 were rejected in the Office action reopening prosecution.

In 32 of the 37 protested applications in which prosecution was reopened, at least one claim was rejected on prior art under 35 USC 102 or 35 USC 103. The type of prior art utilized in these rejections is shown in Table IV. The number shown indicates the number of applications in which the indicated art was utilized.

A rejection of at least one claim was made in 33 of the 37 applications in which prosecution was reopened. Of the remaining four, 2 have been placed in interference proceedings, 1 is undergoing public use proceedings and in 1 an allegation of fraud is under investigation. The number of claims rejected, the grounds for the rejections and whether the rejections were based upon information furnished by the protester, the examiner or a combination of information furnished by the protester and the examiner is shown in Table V. The number in parentheses indicates claims rejected in applications which have been issued or allowed.

Second Trial Voluntary Protest Program

The Second Trial Voluntary Protest Program was announced in the Commissioner's Notice of September 16, 1975, which appeared in the OFFICIAL GAZETTE on September 16, 1975 at 938 O.G. 945.

Under the Program, a number of applicants were given an opportunity to waive confidentiality of their allowed applications in order to allow publication and public inspection thereof prior to issuance of a patent.

A request for a waiver of confidentiality was mailed in 4,747 applications together with the Notices of Allowance mailed during a three week period in October, 1975. Waivers of confidentiality were received for 1,303 applications within the three-month period permitted. Filing of the waiver of confidentiality served to vacate the Notice of Allowance. The 1,303 applications were published and at least one claim and a drawing figure, if any, from each was published in the OFFICIAL GAZETTE. Publication of the applications commenced on January 20, 1976 and was completed on April 20, 1976.

The period for submitting protests was three months in length running from the date of publication. During the protest period, 71 protests were filed in 68 applications.

The evidence against allowability of claims submitted in the 68 applications was considered by the appropriate examiners and group directors. The group directors determined that prosecution should be reopened in 43 applications. No prima facie showing of non-patentability was deemed made in the protests to 25 applications, and consequently, the prosecution was not reopened in these applications.

5. 9.1 percent of the published applications were continuation-in-part applications.
6. 6.8 percent of the published applications were continuations.

The following data show the origin and ownership of the published applications as compared to the patents issued in 1975.

Totals	4,747	1,303	27	68	43	25

The following data were tabulated about the 1,303 published patent applications:

1. 5.2 percent of the applications published were protested.
2. 305 requests for access to the published applications were made during the protest period.
3. Approximately 200 requests for copies of the file wrapper contents of the published applications were made during the protest period.
4. 9.9 percent of the published applications were divisional applications.

As indicated above, 71 protests were received in the 68 protested applications. Three applications attracted two protests each. The 43 applications in which prosecution has been reopened constitute 63 percent of the applications in which protests were received.

The issues or grounds for non-patentability raised in the 71 protests filed are tabulated in Table IX. The number shown indicates the number of protests which involved the indicated issue. It will be noted that some protests involved more than one issue.

Most of the protests filed included the citation of at least one prior art reference. A few protests were based upon prior art already of record in the applications. Others were based upon newly cited references, and some were based upon a combination of prior art of record with newly cited references. The number of protesters relying upon prior art and the type of references relied upon is shown in Table X.

Of the 1,235 published applications which were not protested, 876 had issued as patents on or before December 28, 1976. Nine of the protested applications had issued as patents. One application in which no protest was filed has been reopened for prosecution by the examiner as a result of prior art submitted in a protest to another application.

Conclusion

The Trial Voluntary Protest Programs have provided valuable experience relating to the administration of opposition or protest proceedings for allowed applications. The Programs have shown the potential of protest processings for bringing to the attention of the Patent and Trademark Office prior art and other information relevant to the patentability of a patent application which otherwise might not be considered.

Based upon available data it is estimated that the publication of allowed applications for protest prior to issuance and the processing of protests received adds at least $100 to the cost of processing each published application. About two-thirds of this cost is incurred in printing the applications.

In addition, the issuance of the published applications which were not protested was delayed by six to eight months. Protested applications were further delayed for varying periods. It is estimated that if a protest program similar to the trial programs, but applying to all applications, i.e., on a mandatory basis, were in effect, average pendency to issue would be increased by seven to eight months at an overall cost increase to the Office of about $7 million per year. It could be expected that this would result in the ultimate rejection or abandonment of about 3 percent of the applications which would otherwise have issued.

The voluntary participation of patent applicants by waiving confidentiality to permit publication of their applications prior to issue has been quite low—only 1,970 or 29.2 percent of the 6,745 given the opportunity elected to participate.

The degree of participation by the public has also been quite low—a total of 138 protests were filed in 128 or 6.5 percent of the 1,970 applications published.

Participation by both applicants and the public was less in the second trial than in the first. Of the applicants invited to participate, only 27 percent did so in the second trial while 33 percent elected to participate in the first trial. Protests were filed in 5.2 percent of the applications published in the second trial while 9.0 percent of the applications published in the first trial were protested.

If the trial program were continued on a regular, voluntary basis, the expectation would be that average pendency of all issued patents would increase about two months at a cost to the Office of about $1.75 million per year and that less than 1 percent of the patents which would otherwise issue would become abandoned.

If the law were such that the same protest procedures were available for three months after instead of before issue, all additional printing costs and delays in issue would be avoided. Assuming the same proportion of successful protests, the procedure would be expected to result in elimination of about 3 percent of the issued patents. Added cost to the Office would be about $2 million per year. Longer protest periods might be expected to bring forth somewhat more protests.

While these two trials have demonstrated the potential of protest proceedings for having prior art and other information brought to the attention of the Office and thus to avoid the issuance of undeserving patents, it is not planned to repeat the trial program or establish a permanent program for the voluntary publication of allowed applications for protest purposes. It is at least tentatively concluded that use of the same resources in improving the search file and search systems will be more cost-effective in raising the quality of issued patents.

A final evaluation and report on the Trial Voluntary Protest Programs is scheduled for completion in September 1977. We will welcome your comments and opinions on these programs. In the meantime the Office will begin to develop experience under a different procedure for bringing forth prior art applicable to issued patents, that afforded by the reexamination via reissue and the protest procedures contained in the recently revised rules, 37 CFR 1.11, 1.175, 1.176 and 1,291.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of twenty-five dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).

Application in more than one class

SN 48,276. Cheminees Richard Le Droff S.A., Yerres, France. Filed Apr. 2, 1975.

MIRATHERM

Priority claimed under Sec. 44(d) on French Reg. No. 908,348, Dated Nov. 20, 1974.

Class 11—Environmental Control Apparatus

For Heating Equipment—Namely, an Apparatus for Heating One or More Rooms From a Single Fireplace by Recovery of Heat From the Chimney (U.S. Cl. 34).

Class 19—Non-Metallic Building Materials

For Construction Material—Namely, Natural and Artificial Stones, Cement, Lime, Mortar, Plaster and Gravel; and Fireplaces (U.S. Cl. 12).

SN 48,690. B. B. Greenberg Co., Providence, R.I. Filed Apr. 7, 1975.
